Short Manual: SUHV-API 2.0 for Wordpress

Installation

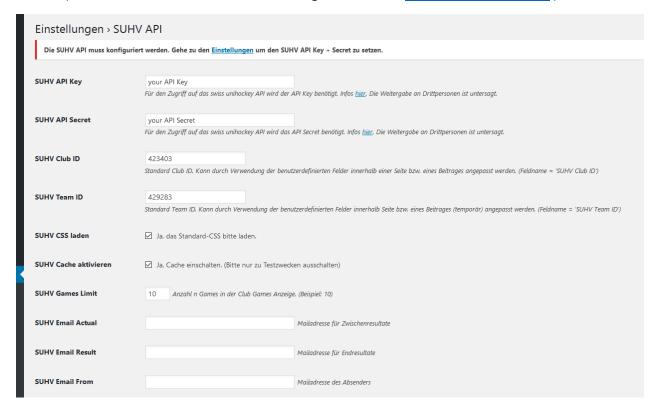

- 1. Place the folder `suhv-api-for-wp` in your `/wp-content/plugins/` directory or install the .zip File Plugin
- 2. Activate the Plugin
- 3. Visit `Settings > SUHV Schnittstelle` and adjust your configuration. At least `SUHV API Key & API Secret`.
- 4. Create some Shortcodes on a page or place a function in a themplate file.
- 5. Adjust the CSS of your theme as needed, to make everything pretty.

Info: Currently the API calls are all set to Language = de (Version 1.x)

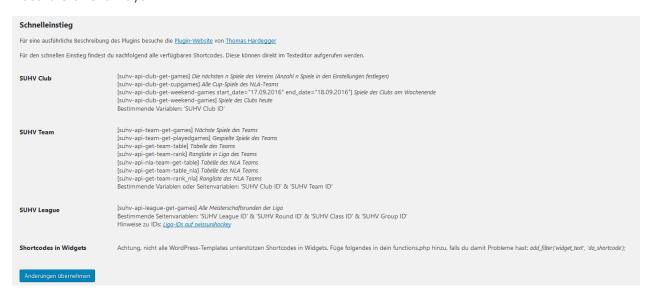

Settings

- 1. Set your API Key and API Secret (a dummy Text for short trial is also possible)
- Set your Club ID and Favorite ID (NLA Team-ID)
 (To retrive this IDs have a look at the navigation-Links on www.swissunihockey.ch)

Mails are in Beta-Testing - not needed
